

Fire Blankets

Features

- Woven glass fibre fabric
- Hard wearing material container
- Portable and easily stored
- Eyelet for maintenance tag

Description

Fire Blankets are ideal where small fat or cooking oil fires are a risk. They can also be used if a person's clothing has caught fire. Correct application will reduce the supply of oxygen to the fire, smothering it either permanently or until more effective fire-fighting equipment can be employed.

Approvals

AS/NZS3504 - 2006 Fire Blankets

Application

Class A Fire
Ordinary Combustibles

Class F Fire
Cooking oils and fats

Class E Fire
Electrically energised equipment
